Dear Colleagues:

The organization committee, composed of delegates of the International Andreas Grüntzig Society and Swiss and German hosts, are pleased to announce the 30-Year Anniversary Meeting of Coronary Angioplasty to be held in Zürich, Switzerland on September 15/16, 2007.

This 2-day program is designed for clinicians specializing in cardiology and internal medicine and will celebrate this historic milestone as well as a distinguished international faculty that helped define the entire field. Our program curriculum will address state of the art, the future, and the historical events impacting the field of coronary intervention.

We hope that you will be able to attend and look forward to what is going to be a historic, memorable, and emotional 2-day event at the site that was the cradle of coronary angioplasty.
